

Offered for the first time in Australia from 2016:

BACHELOR OF ADVANCED FINANCE AND ECONOMICS (HONOURS)

The University of Queensland's new Bachelor of Advanced Finance and Economics (Honours) is your passport to becoming a leader in the fields of finance and economics.

The first degree of its kind to be offered in Australia, this elite undergraduate program will be available from Semester 1 2016 to a small and exclusive cohort of the best and brightest.

Offered through UQ's Faculty of Business, Economics and Law, this new degree is an interdisciplinary program jointly taught by the UQ Business School and the School of Economics, two of the most highly-ranked schools globally.

With places limited to around 50 exceptional, driven students, you will forge life-long connections with your cohort, both personally and professionally. You will work with leading faculty members and other high-achieving students and you will also benefit from our strong links with leading employers.

You will be challenged to develop the analytical rigour and strong technical foundations that are required to pursue a career as a leader in finance, investment banking, capital markets, equity and venture capital or as an economist in a wide variety of careers in both the private and public sectors.

You will have the opportunity to take part in work placements at leading businesses and government agencies both in Australia and overseas, and to study for a semester at one of our international partner universities. Students also have the option of pursuing a dedicated research pathway in either economics or finance, leading to graduate-level study.

All successful graduates will possess a globally-recognised Level 8 Australian Qualifications Framework degree.
