TOP REASONS TO CHOOSE UQ

SUCCESSFUL GRADUATES

Higher than national averages for full-time graduate employment rates and salaries

GREAT EXPERIENCES

Long- and short-term overseas study exchange, vacation research programs and more

GLOBAL CONNECTIONS

Extensive graduate network, strong industry partnerships and many notable alumni

ACCESSIBLE LOCATIONS

Three easy-to-access campuses – catch public transport, ride, walk, or drive

VIBRANT LIFESTYLE

Dynamic sports and cultural activities, 200+ clubs and societies

WORLD-CLASS FACILITIES

Continuously improving teaching, learning, sporting, and research spaces

EXCELLENT TEACHERS

More national teaching awards than any other Australian university*

*As at December 2015, UQ has received 114 Citations for Outstanding Contributions to Student Learning, Awards for Teaching Excellence, and Awards for Programs that Enhance Learning.

LEADING RESEARCH

Global research powerhouse with all fields above world standard**

** 2015 Excellence in Research for Australia (ERA) assessment

HIGH-QUALITY PROGRAMS

Most comprehensive range of programs and courses in Queensland

WHY STUDY WITH US?

Learn with the best

Our award-winning lecturers are dedicated to helping you achieve success in your field. You will have access to their extensive academic and industry expertise, giving you an edge. In addition to lectures and tutorials we offer academic advice, peer-assisted study sessions and employment services to ensure you reach your potential.

VIHAN MUTHANNA

Bachelor of Commerce/Economics

“ UQ has a reputation as one of the best performing universities in Australia. It’s also well respected within the business and economics disciplines which made my decision to study here easier.

I am President of the UQ Business Association which has me actively involved in extra-curricular activities. If I had one piece of advice for students it would be to join a UQ club – it gives you the opportunity to meet like-minded students while networking with business leaders from around the country.

Choose business

Challenge yourself and develop the skills to thrive in constantly changing and highly competitive business environments. UQ Business School’s vast network of industry contacts means you can develop practical experience and professional connections through internships at some of the world’s biggest companies. Studying business opens up opportunities for a wide range of change-making careers in the public, private and not-for-profit sectors.

Choose commerce

Commerce graduates have extensive career options in accounting and consulting firms, as stockbrokers, and more both in Australia and around the world. Throughout your degree you will develop strong technical knowledge and skills in critical evaluation, problem-solving and practical application. Broaden your opportunities by taking part in internships, industry placements or international student exchange, while working your way towards an internationally recognised degree that will allow you to adapt to, manage, and influence the dynamic business world.

Choose economics

Economics graduates are among the highest paid and most sought after in Australia.* Economics develops your analytical, modelling and prediction skills, and instils an understanding of how society uses our scarce resources. These skills are in high demand by consultancies, governments and international agencies. Your economics degree will equip you for a meaningful career helping to resolve

some of the world’s greatest challenges, including the allocation of humanitarian aid, complex environmental issues and the ageing population.

Choose tourism

Are you seeking a rewarding international career in tourism, hospitality or event management? Tourism blends core business skills and industry knowledge with valuable practical experience, ensuring you receive a well-rounded education. You will learn to provide solutions to industry-specific challenges such as sustainability, and create meaningful change in your chosen field. Our graduates pursue careers in event management, food and beverage management, consultancy, hotel and resort management, and in local or international tourism organisations and wholesale travel.

Get involved

Our active student body and student associations help you get the most out of your degree by providing study support, professional development and social networking opportunities.

Accreditation

UQ’s business, commerce, and tourism programs have world-recognised accreditations.

*Graduate Destination Survey, 2015

WORK ANYWHERE IN THE WORLD

Our qualifications are recognised internationally, allowing graduates to work anywhere in the world

WIDE INDUSTRY NETWORK

Undertake internships in the offices of some of the world's leading companies, through our vast industry networks

DEDICATED EMPLOYABILITY TEAM

Our Student Employability Team (SET) is dedicated to strengthening student employability and career outcomes

UQ BUSINESS SCHOOL

Study with a business school that is independently ranked as world-class.

UQ Business School has been independently ranked as one of the top business schools in Australia and in the world. What sets us apart is we stand for the kind of business that matters; business that creates sustained and positive change in industry and the broader community. You will learn from the most innovative business educators in Australia and they will challenge your thinking. You will take in the most up-to-date and relevant theory and have the chance to apply this knowledge to business settings through internships and industry projects.

Graduates in demand

The diversity of our programs means our graduates are in demand in a wide range of industries across the public, private and not-for-profit sectors. Many of our alumni work in leadership positions in accounting, banking and financial services, consultancy, advertising, event management, marketing, property valuation, state and federal government, sales and retail, tourism, and web design and development.

Our lecturers are academic and industry leaders

Our lecturers are consultants and advisors to leading companies worldwide. The majority of our 160 academic staff hold PhDs and produce research papers that are consistently cited in the world's top-tier journals. This ensures our teaching is always fresh and relevant. Our programs cover a broad range of business disciplines and our lecturers supervise a diverse range of research higher degree topics.

Learning that pushes your boundaries

We have a reputation for strong links with the business world. Our students access industry leaders for real-life projects, as mentors and for internships. Another unique opportunity is our Community Engagement Program (CEP). By participating, you can build your skills working on community sector projects that benefit not-for-profit and charity organisations. It's an opportunity for you to enhance your business planning, strategy, and networking skills and leadership capability, while giving back to the community.

TOP RANKINGS

- We were the first business school in Australia to earn both the European Quality Improvement System (EQUIS) and Association to Advance Collegiate Schools of Business (AACSB) accreditation
- We are classed as above world standard in six fields of research in the Australian Government's ERA Assessment: business and management; tourism; information systems; accounting, auditing and accountability; banking, finance and investment; and marketing
- We are a founding member of The International Centre of Excellence in Tourism and Hospitality Education (THE-ICE)
- We are the only business school in Australia with programs that hold United Nations World Tourism Organization (UNWTO) accreditation
- Our MBA program is ranked number one in Australia by *AFR BOSS Magazine* and number one in Asia Pacific by *The Economist*.

SCHOOL OF ECONOMICS

Study with one of the largest and most influential economic schools in Australia.

UQ's School of Economics is consistently ranked in the top two per cent of research-intensive economic departments in the world. The School is a leading teaching and research centre both nationally and internationally. Our world-class academic staff and diverse range of courses will equip you with the ability to apply your theoretical knowledge to real-life problems. Economics provides meaningful solutions to many of the big issues facing our world, such as climate change, the ageing population and assisting economies to be competitive in a globalised world.

Graduates in demand

Economics graduates are highly sought after and among the highest paid graduates in Australia.* They work as economists in consultancy, for government or for international agencies and employers

including the Reserve Bank of Australia, the World Bank, the International Monetary Fund, federal and state treasuries and government departments, city councils and local government, top consulting firms, financial services firms and global corporations.

Our lecturers are academic and industry leaders

You will be learning from some of the most talented economists in Australia. Our accomplished scholars claim a large share of Australia's economics honours, competitive research grants, prestigious fellowships and high-quality publications. We are home to over 70 active teaching and research staff, including specialists in energy and climate change, productivity and efficiency analysis, development economics, and labour and agricultural economics.

TOP RANKINGS

- Ranked #1 economics research institution in Australia according to RePEc*. We are ranked #2 in the world for research into productivity and efficiency placing us above Harvard and the London School of Economics
- In the Excellence in Research for Australia (ERA) 2015 National Report, we ranked well above world standard (rank of 5) in economic theory and above world standard (top ranking of 4) in economics
- Nobel Prize Laureate in Economics (1994) for Game Theory, John C Harsanyi (1920–2000), launched his academic career as an economics lecturer at UQ
- Our research strengths span economic theory, applied economics and econometrics.

*Research Papers in Economics - a world wide academic grading system.

Learning that pushes your boundaries

Our challenging academic environment attracts the brightest and best economics students from around the country and internationally. Of the 1200 enrolled in economics, more than 450 are international students. You will find the school to be collaborative and friendly. As a student you will be encouraged to be part of the rigorous debate that challenges and extends conventional economic thought.

*Graduate Destination Survey, 2015

Majors

The Bachelor of Business Management provides you with a comprehensive base for a successful career in business. Compulsory foundation courses in areas such as management, marketing, and finance equip you with core business skills. You build on these by choosing one or two (of eight) specialist majors that align with your areas of interest. A major consists of six courses from the one area of specialisation. As you work through your chosen majors, you will develop managerial and entrepreneurial capabilities.

Advertising

Advertising unleashes a world of opportunities for all budding creative professionals. You will be introduced to the foundations of advertising and the media, and develop the business, analytical and creative skills necessary to launch an advertising career. Consumer behaviour and media planning and buying are some of the areas in which you will gain skills to become an effective advertising manager. You will also develop a range of hands-on professional skills in the creative design and development of advertising campaigns.

Careers: Graduates enjoy careers in the media, at advertising agencies, as media buyers, and in marketing departments of private and public companies and government.

Business Economics

This major equips you with the knowledge and skills to effectively apply economic analysis to business management. It also supports a career in corporate strategy, production management, financial planning, capital budgeting, economics or business analysis. Business economics is also highly sought after in marketing, purchasing or human resource management related careers. You will learn the economics of growth strategies and how to apply economic analysis to macroeconomic modelling, forecasting, scenario planning, demand analysis, pricing policies, competitive strategies, capital budgeting, investment and cost-benefit analysis.

Careers: Graduates enjoy careers in banking and financial services, consultancies and government departments.

NAZLEE ATMEH

Bachelor of Business Management/
Commerce

I've participated in social sport since my first year at UQ and I've been part of the student executive for the UQ Volunteers Society and the UQ Business Association. There are more than 190 affiliated clubs at UQ with something for everyone, and becoming involved in them was the best decision I ever made. They are a great platform to meet a variety of new people and have new experiences.

Business Information Systems

Obtain in-depth training analysing and managing information in a business environment. You will develop business analyst skills including data analytics and business information security, and knowledge to advise on organisational information requirements and strategy. In addition, you will learn to understand the business context, elicit organisational requirements, and design and manage applications involving business data. This program equips you with broad knowledge of business and technology issues to become a well-rounded professional.

Careers: Graduates enjoy careers in consulting, infrastructure, public utilities, online services/marketing, and public sector departments and technology agencies.

Human Resources

Studying Human Resources (HR) provides you with the skills and experience to create positive work environments and assist people to achieve their own career aspirations. You will gain knowledge and skills in areas such as managing people, Australian and international industrial relations, selection and recruitment, organisational change, interpersonal communication, conflict resolution, training and development, negotiating employment agreements and leadership.

Careers: Graduates enjoy careers as professional HR managers in public or private sector roles, for example in professional practices, trade unions, employer associations, government departments, management consultancies, industrial relations, negotiation and advocacy, and occupational health and safety.

International Business

Businesses competing in international markets must build relationships with customers, adapt their products to international markets, and manage the diverse logistical and supply channels of various countries. You will learn how cultural, regulatory and operational conditions impact the strategies needed to succeed in global markets. You will also gain an understanding of the key issues in international trade and investment, international marketing, international human resource management, and operations in firms engaged in international business, finance and strategy.

Careers: Graduates enjoy careers in a wide range of private businesses looking

to expand their operations or trading networks overseas, or in state and federal government organisations or trade associations.

Marketing

Marketing is about understanding and identifying customers' needs, communicating brand values, and engaging customers to increase business sales. For this reason, marketing is a crucial component of the success of any business. By studying this major you will develop an understanding of key concepts underlying marketing practices such as applied market research, qualitative and quantitative marketing, relationship building, product and service management, product innovation, and communication and marketing strategy.

Careers: Graduates enjoy careers in tourism, the entertainment industry, sales and retail, marketing consultancies, market research, government agencies, not-for-profit organisations, and the marketing departments of medium and large-sized businesses.

Real Estate and Development

This major examines the theoretical and practical knowledge required to operate as a property professional. You will develop

your knowledge of business and land economic principles. During your studies you will learn about the principles of property law, finance and investment, asset management, town planning and property valuations. You will apply advanced software and computer programs to solve business problems related to land development and management.

Careers: Graduates enjoy careers in property investment, development, management and valuation.

Sustainability

Companies worldwide are investing in businesses that are socially-responsible and environmentally-sustainable, as well as being profitable. You will learn to manage the financial, social and natural environment aspects of a firm's activities to achieve sustainable outcomes. This major covers emissions trading, corporate social responsibility, communicating for sustainability, strategic management in response to climate change, entrepreneurship, and renewable energy technology development.

Careers: Graduates enjoy careers in corporate strategy, sustainable management, business development, corporate communications and international business.

Why commerce at UQ?

UQ Business School commerce graduates are in high demand. We are well-regarded for our commerce programs and currently rank 28th in the world for accounting and finance*. By choosing to study the Bachelor of Commerce, you will develop a combination of core skills, specialist knowledge, and critical evaluation and problem-solving abilities. Your expertise will ensure you are sought after by employers and adapt well to the rapidly shifting business world.

*2015 QS World University Rankings

What you will study

How can business performance be measured and assessed? What aspects of performance can be improved and how? How can company, project and investment value be determined to make buy/sell decisions? How do foreign markets, derivatives and debt markets affect my client's portfolio? What is an

auditor's responsibility? What issues arise from operating in a virtual corporate environment? You will investigate these topics and more in our Bachelor of Commerce program.

After examining the fundamental principles of commerce, you will learn how to apply and adapt these in response to specific challenges and the changing business environment. You will build more specialised knowledge and skills in one or two majors as you progress through years two and three of your degree. If an in-depth understanding of how accounting, business information systems or finance add value to business and the global economy is of interest, then this program is for you.

Career opportunities

This program will prepare you for a career in the public or private sectors in accounting, banking, financial management, business analysis, business information systems or general management.

ADAM LOWEY

Bachelor of Commerce (graduate 2015)

UQ Business School's commerce program surpassed my expectations with unparalleled access to professionally-experienced lecturers and a wide range of courses that have driven my enthusiasm. The course coordinators have led successful careers and are fantastic in sharing their in-depth knowledge.

Honours

Our Honours program is a challenging and rewarding extra year of study. It advances your accounting and finance knowledge through understanding, evaluating and undertaking research. Honours is a small-intake program, admitting only the top students from the Bachelor of Commerce.

Majors

Develop in-depth skills and experience by choosing one or two majors relevant to your desired career. A major consists of six courses from the one area of specialisation.

Accounting

If you aspire to an accounting career, this major is essential. It is also extremely valuable if you want a career in the corporate, government or not-for-profit sectors, as it provides a solid foundation for sound financial decision-making. The courses offered will enhance your financial acumen by developing your knowledge of contemporary financial and management accounting practice, tax and corporate laws. They will build your skills in critical analysis, problem solving and reporting. By following plans that cover the necessary prerequisites, you can apply for associate membership of the key Australian accounting professional bodies, Certified Practising Accountants (CPA) Australia and Chartered Accountants in Australia and New Zealand (CAANZ).

Careers: Graduates enjoy careers as accountants in public and private corporations, management and consulting firms, small business, banks and other financial institutions, government and government-owned corporations, and not-for-profit organisations.

Business Information Systems

Obtain in-depth training analysing and managing information in a business environment. You will develop business analyst skills including data analytics and business information security, and knowledge to advise on organisational information requirements and strategy. Why international hotel and tourism management at UQ?

UQ Business School is internationally recognised for its tourism programs. It is the only Australian business school to offer programs that hold United Nations World Tourism Organization (UNWTO) accreditation. The BIHTM blends cutting-edge research and theory with practical exercises to develop your managerial abilities and business acumen. Our lecturers have strong industry and research experience, integrating their expertise into their teaching.

A special feature of this program is its Work Integrated Learning (WIL) component. Through WIL, you will have access to hands-on opportunities including individual placements, executive shadowing positions, wine immersion programs, Disney World internships and domestic and international study tours. Upon graduation you will have the knowledge and practical skills to excel in event, hospitality or tourism management.

What you will study

How can we promote tourism and ensure the sustainability of natural resources? How can social media impact the way we travel? What effects will the world's growing population have on tourism? You will examine all of these issues and more in the BIHTM.

You will have opportunities to develop, promote and deliver events, design and market tourist facilities and attractions, and engage in and evaluate hospitality encounters. Contemporary issues such as sustainability, innovation and customer service will be explored on local, regional and global levels. You will learn to develop solutions to current and future industry challenges, creating change wherever you go.

Career opportunities

Thanks to your advanced management training and impressive professional networks, you will be well-positioned for a promising career in the tourism, hospitality or events industries. Our graduates are in high demand with employers, both locally and internationally.

Honours

This program functions as an extra year of high-quality study, showing employers you have what it takes to excel in the tourism, hospitality or events industries. The high-level research skills you will develop will open up further opportunities for you in industry – or they could lead to a research higher degree program.

Majors

Develop in-depth skills and practical experience by choosing majors relevant to your desired career. You can specialise in one or two areas that align with your interests. A major consists of six courses from one area of specialisation.

Event Management

Event management is an exciting and growing industry. You will gain an understanding of the nature, characteristics and role of events and specialist knowledge in all aspects of event management. You will learn about the

history and impact of festivals and study event operations for business, artistic, cultural and sporting events. You will also develop managerial and entrepreneurial capabilities in marketing, sponsorship and fundraising for events.

Careers: Graduates enjoy careers as event and festival managers, consultants, conference and convention centre managers, and in various roles in public and private tourism organisations.

Hospitality Management

As the hospitality industry shifts from a skills-based to a knowledge-based industry, higher learning has become critical for career success. This major focuses on the vibrant global hospitality industry, which includes hotel, restaurant and resort management. You will develop an understanding of and skills in: the essence of 'hospitality', the international hotel industry, technological applications in hospitality management and large-scale services management, small business and entrepreneurship, casinos and gaming, and managing food and beverage.

Careers: Graduates enjoy careers in management and marketing roles in hotels, resorts, casinos, restaurants, cruise-liners, commercial catering and clubs.

Tourism Management

Tourism is one of the most important industries in Australia. This area of study covers tourism operations, destination

marketing and policy. You will develop managerial expertise in issues relating to sustainability, ecotourism, policy and planning, visitor behaviour and the environmental, social and economic impacts of tourism. You will be at the forefront of current and future trends and issues for the industry, including niche markets. Case studies and site visits provide practical and relevant skills and knowledge to ensure your success upon graduation.

Careers: Graduates enjoy careers in tourism organisations, tourism and hotel consultancies, and other tourism-related industries including wholesale and retail travel, airlines and the cruise industry.

Important

ATAR
97

Duration Four years full-time or part-time equivalent

Location St Lucia

Entry requirements# Year 12 (or equivalent) English, Mathematics B or C

QTAC code 714311

Honours Honours will be awarded to all graduates of this program

International availability Yes
Please refer to uq.edu.au/international for more information

Prerequisites are expressed in terms of Queensland Year 12 subjects

What you will study

What are the economic and social outcomes of policy changes? What effect has the Global Financial Crisis had on macroeconomic theory and monetary policy? Which financial issues confront most companies? You will explore these issues and more in this interdisciplinary program taught by UQ Business School and School of Economics.

You will develop the analytical rigour and technical knowledge to be an economist in a variety of public and private sector careers or a leader in finance, investment banking, capital markets, equity or venture capital. At the end of year three you will choose a 'pathway' for your final year. Depending on your passions, you can pursue an employment-focused pathway or a dedicated research pathway in economics or finance.

Career opportunities

Potential career pathways include investment banking, funds management, management and financial consulting, stockbroking, infrastructure financing and development, international finance and trade or government agencies such as the Reserve Bank. You may also go on to study your PhD.

Professional qualification

As a graduate you will hold a globally-recognised Level 8 Australian Qualifications Framework degree.

Majors

You can develop greater depth in a major that is most relevant to your desired career. A major consists of courses from one area of specialisation to provide additional depth to the discipline. Undertaking a major may lead to further study in the discipline via a research higher degree, such as a PhD.

Economics

In this major you will gain a deeper understanding of macroeconomics, microeconomics and econometrics. Graduates may enjoy careers as analysts, advisors or economists in fields including business, finance, international development, management or research.

Finance

In this major you will take courses in financial management, portfolio management and corporate finance principles including risk assessment and business statistics. Graduates may enjoy careers in corporate finance, investment banking, stockbroking, management or financial consulting.

No major

You will complete a four unit team project and various elective courses in economics and finance. These elective courses may comprise an internship and/or a tailored overseas study experience at one of our prestigious international partners.

Why finance and economics at UQ?

With places limited to around 50 exceptional, driven students, you will forge lifelong personal and professional connections with your cohort. Working with our top academic staff will help you establish strong links with leading employers. You may also have the opportunity to complete work placements at businesses and government agencies in Australia and overseas and to study for a semester at one of our prominent international partner universities.

Bachelor of ECONOMICS

Economics is a social science that will train you to question, analyse, model and predict human behaviour. As a Bachelor of Economics (BEcon) student you will learn how people and organisations make decisions about using our scarce resources.

Prerequisites are expressed in terms of Queensland Year 12 subjects

Why economics at UQ?

UQ is the only institution in Queensland, and one of a select few in Australia, to offer the Bachelor of Economics. The School of Economics is Queensland's largest, most experienced and influential economics school with more than 70 active teaching and research staff. Our school's research-intensive focus ensures content is engaging and relevant for graduates today and into the future. If you choose to study here, you will develop a range of statistical and analytical tools you can use to solve pivotal policy and decision-making challenges for business and government.

What you will study

Which factors led to the Greek economic crisis? What does it mean if the Reserve Bank of Australia reduces the cash rate? How does climate change impact economies? These are just some of the questions that a Bachelor of Economics at UQ will help you answer.

You will develop core economic skills through set compulsory courses. You will also be able to tailor the program to your interests by choosing from more than 40 elective courses in areas such as econometrics, financial markets, international trade and development, and the economics of business, health, labour, resources and the environment.

Career opportunities

Economics graduates are highly sought after by employers. You could work as an analyst, advisor, consultant, economist or researcher in a range of fields including international consulting, infrastructure development and planning, environmental management, international finance, investment and trade, natural resource and agricultural economics, public health, treasury or statistics.

Professional memberships

As a graduate you may be eligible for memberships with a diverse array of professional bodies:

Majors

You can develop greater depth in a major that is most relevant to your desired career or choose a mix of courses from across five majors.

Business and Industry

If you want the challenges of a fast-paced career, this major is for you. Enhance your economic decision-making capabilities and learn how to apply them in the business sector, working to improve enterprises' competitiveness and efficiency. Courses cover issues such as managerial economics, industrial and labour economics, the regulatory environment and benefit/cost analysis techniques. You will develop critical thinking skills and understanding applicable to businesses across all sectors and industries.

Careers: Graduates enjoy careers in industry bodies, government departments, consultancies and private enterprise.

Economics and Public Policy

In this multidisciplinary major, you will learn how governments develop public policy and how government intervention can impact economies in an increasingly globalised world. You will be taught the tools, concepts and techniques to provide advice on policy development (such as taxation, education, health and transport) as well as to evaluate existing policies. Core courses in public finance and regulatory economics emphasise the theoretical framework and rationale

for government intervention. Elective courses include advanced microeconomics, macroeconomics, and political sciences.

Careers: Graduates enjoy careers in public policy, government bodies, not-for profits, private enterprise and politics.

International Trade and Finance

International trade and finance are key factors affecting the Australian and world economies. This major focuses on the economics of financial systems, mechanisms and emerging issues in today's globalised economy. You will develop an understanding of the complex nature of economics in the international environment and its close relationship with financial management firms. You will also gain the analytical skills for informing managerial and policy responses across government and business on international trade and finance issues.

Careers: Graduates enjoy careers in financial institutions, government agencies, consulting firms, and Australian and international private enterprises.

Natural Resources and Environment

Today, the economic and ecological value of our diverse natural resources is recognised at the international, national and local levels. The effective use of these resources is an important social and political issue. This major will give you the economic analytical tools needed to solve key environmental problems, including the management of renewable and non-renewable natural resources (i.e. river systems, agricultural

land, energy and minerals). You will understand and be equipped to deal with the challenges facing business, government and the wider community.

Careers: Graduates enjoy careers in public policy, environmentally-focused agencies, private enterprise, mining and energy companies.

Quantitative Methods

Quantitative methods will allow you to facilitate better decision-making by governments and businesses. You will learn how to provide rigorous, evidence-based economic analysis that is verifiable and objective. This major has a strong mathematical and modelling focus, covering the measurement, analysis, projection and modelling for a diverse set of economic factors and scenarios. You can select courses in the areas of econometrics, benefit/cost analysis, advanced mathematical economics, business and economic decision techniques and experimental economics.

Careers: Graduates enjoy careers in research consultancies, management organisations, private business and government-orientated enterprise.

UQ offers
THE ONLY
Bachelor of
Economics in

COURSE LIST

COMPULSORY COURSES

- Accounting for Decision Making
- Introductory Microeconomics
- Introductory Macroeconomics
- Tools of Economic Analysis
- Quantitative Economic & Business Analysis A
- Microeconomic Theory
- Macroeconomic Theory
- Microeconomic Policy
- Macroeconomic Policy
- Introductory Econometrics

Honours

Our Honours program is an extra year of intensive study for high-achieving students within a small-group learning environment. Honours will equip you with an advanced set of economic and research tools that will prove valuable in the global workplace or in a research higher degree program.

JAKE SULLIVAN

Bachelor of Economics/Commerce

I chose UQ because of its economics program – nowhere else in Queensland offers such rigorous undergraduate economics coursework and potential for specialisation. My lecturers and tutors all took a genuine interest in their students' success. From my experience, the teaching at UQ strikes an excellent balance between industry focus and academic knowledge, meaning students are prepared for meaningful careers in industry or for postgraduate study.

DOUBLE YOUR OPPORTUNITIES

24
business and
economics
dual program
combinations
available

Improve your employment prospects and broaden your skills and knowledge by studying two programs at the same time.

As the world around you changes, new and fascinating career opportunities are created every day, and job roles increasingly combine multiple disciplines.

A dual program, also called a double degree, will equip you for this evolving job market. It gives you the flexibility to study two different disciplines in a much shorter time, by studying only the mandatory courses for each program with fewer or no electives.

Benefits to “like”

Save time

Graduate with two Bachelor programs in as little as four years – a much shorter time than it would take to study both programs separately.

Broaden your skills

A degree in business will equip you with the skills and self-confidence to effectively manage a wide range of competitive business environments. Complemented by studies in the Bachelor of Arts you will be placed at the centre of contemporary information society and economy via skills in criminology, economics, public policy, sociology and writing.

Strike a balance

Why compromise when you can balance your studies and your sanity by pursuing both your career ambitions and your passion? Dual program students appreciate the diversity of topics offered in their two different programs.

Get an edge

As a dual program graduate you will have a competitive advantage with employers, and you will broaden your prospective employment to a wider range of industries.

Learn from the best

By studying in two disciplines you will benefit from exposure to a more diverse range of UQ's outstanding teachers and researchers.

SET YOUR CAREER IN MOTION

The Business, Economics and Law Faculty's Student Employability Team (BEL SET) is dedicated to helping you access opportunities, increase your employability and manage your career.

Learn to
**STAND OUT
FROM THE
CROWD**
in a competitive
job market

We recommend you start developing your employability skills and building your personal and professional profile as soon as you commence at UQ, so you have several years of practise and experience to include on your CV when you graduate.

Through the BEL SET programs you will learn and apply employability skills that will help you stand out from the crowd in a highly competitive job market.

We partner with external employers, alumni, businesses, government and community organisations to create opportunities for internships, graduate career placements, learning and engagement.

Access BEL SET's tailored programs and services at every stage of your studies – as an undergraduate or postgraduate student, as well as an alumnus for six months after graduation.

Pre-course:

Get SET

Discover the BEL SET programs and services available to you as a UQ BEL student:

- information about careers and job sectors to help you decide on a career path
- hands-on experience working on real industry projects with the not-for-profit sector
- individual consultations including guidance about career options and mock interview sessions
- workshops to equip you with the skills and attributes to be work-ready
- networking events and opportunities to connect with employers and industry
- UQ CareerHub – an online careers portal where you can post your CV and access details of job vacancies and internships
- information on closing dates for graduate applications with major Australian employers
- UQ Advantage programs, UQ Careers Service and Going Global.

SEWOK YANG

BEL graduate 2010
Baker & McKenzie

I first became involved with BEL SET through the student Employability Workshops. I was asked to drop by and share my experiences as a former BEL international student who integrated into Australian culture. For me, it was a rewarding experience – it was like going back and advising my younger self. I gave the students some tips on successfully transitioning into work in Australia and overcoming challenges like language and social and cultural norms. I can only imagine how much easier my student experience would have been if I had access to BEL SET's services.

First-second year:

SET in motion

Participate in a series of programs and workshops designed to SET you up with insight on career options and employability skills:

- consult with BEL SET to create your Career Attainment Plan
- create a CV and LinkedIn profile
- seek part-time work
- get involved in voluntary work and on-campus activities
- review the career insight resources on the BEL SET website.

'A Day In The Life' event series

Connect with a panel of young professionals about their careers and experiences transitioning to work after graduation. Aimed at first and second year students, these sessions give you an insight into what it would be like to do their job, helping you explore possible career options in different industries.

Connect with a
**PERSONAL
INDUSTRY
MENTOR**
via the BEL Career
Mentoring Program

Second-third year:

SET the bar high

- Book a consultation with BEL SET for help with internship applications
- Apply for internships and vocational work integrated learning programs
- Attend employer-led workshops for help with applications
- Take part in the Community Engagement Program (CEP) and seek voluntary work opportunities
- Attend interactive employability workshops
- Participate in networking events
- Take part in work-shadowing and workplace cultural excursions.
- Apply for the Student Work Experience Program (SWEP)

Community Engagement Program (CEP)

Make a positive impact and create change in the community by applying your classroom knowledge to projects in the not-for-profit sector. The program will challenge you to develop your leadership capability and your business-planning, strategy and networking skills. It is an opportunity for you to grow your network, gain employability skills and build your personal and professional profile.

Employability Workshops

Practise skills to help you when applying and interviewing for jobs. Workshop topics include organisational awareness, preparing CVs and applications, interview techniques and role-playing and negotiating, interpersonal and presentation skills. The workshops are designed primarily for international students but all BEL students are welcome to attend.

Student Work Experience Program (SWEP)

This recruitment and work experience program for mid-course students will provide the opportunity to practise participating in a competitive assessment centre recruitment process, similar to those used by large organisations. Successful candidates will secure a professional full-time internship for two to three weeks during the end of semester break.

Penultimate and final year:

SET for success

Recruitment for graduate roles often commences a year prior to graduation. BEL SET can help ensure you are prepared.

- Become a mentee in our BEL Career Mentoring Program
- Have an individual consultation focused on applications and mock interviews
- Attend professional networking events
- Get inspired at The Edge Student Leadership Series events.

BEL Career Mentoring Program

Complement your academic knowledge by connecting with a personal industry mentor – often a BEL alumnus. Mentors are an invaluable source of insight and support as you make the transition from student to graduate. Your mentor can share tips on how to apply your learning to work, help you understand what attributes and behaviours are valued in the workplace and

guide you in using your existing skills to find employment.

Employer-led Workshops

Learn about upcoming graduate employment opportunities and hear directly from employers on how to prepare and succeed with your applications including pre-preparation, psychometric testing, interviews, assessment centres and managing offers. These sessions are an excellent opportunity for you to make a great first impression with key employers and to network among them.

The Edge Student Leadership Series

Hear from inspirational leaders including CEOs, managing directors, partners, general managers and entrepreneurs across a range of industries. Our guest speakers share their personal and career journeys, giving you invaluable first-hand insight into how business leaders got to the top of their game and how they overcame any challenges they faced.

Post course:

SET for life

You have been studying among your future colleagues, so it is worthwhile staying connected with them through UQ's alumni community via the popular Alumni Lecture Series and other engaging events.

To support your transition to work, for six months post-graduation, you can also continue to access individual consultations with your BEL SET contact and attend the workshops/events.

After two years in the workforce get involved in the BEL SET programs to coach undergraduate students or become a mentor in the BEL Career Mentoring Program.

Like 'UQ BEL Student Employability Team' on Facebook

JILLIAN LORENZO

Bachelor of Commerce/Laws

BEL SET is constantly working to improve employment opportunities for commerce students. They frequently hold networking events and skill development and résumé preparation seminars, often with recruitment personnel from the Big 4 firms. These events have given me insight into what they are looking for in graduates. SET also has great industry contacts and always have you in mind when they identify work experience opportunities.

With their help, I have secured interviews for several vacation programs – since they already had my details, they were able to contact me immediately about relevant opportunities and pass on my information. This relationship has given me a huge advantage, increasing my chances of securing a graduate position. I would recommend connecting with SET as soon as you can to see how they will help you.

YOUR GLOBAL ADVENTURE

See the world differently with UQ Abroad

Learn a language

Want to study somewhere you don't speak the language?

You can take an extra-curricular course before you go at UQ's Institute of Modern Languages (IML), which offers:

- more than 30 languages
- beginner to advanced levels
- listening, speaking, reading and writing skills
- small, friendly classes
- no formal entry requirements.

Although courses will not count towards your program, IML assesses your progress as you go.

Find out more at iml.uq.edu.au

ELLIOTT JOHNSON

Bachelor of Commerce/Economics
Participated in the CUHK International Summer Session – short-term program

From the beginning I knew Hong Kong would present exciting opportunities, adventure and the chance to experience the world's most interesting region. At The Chinese University of Hong Kong's International Summer School I learnt about international finance from the 400-strong cohort of students, predominately from Europe and the US. Throughout the course, many shared their experiences of living through the global financial crisis and the ongoing Euro Crisis.

I travelled almost every weekend from beach camping on the remote Hong Kong coast to touring Shanghai and Beijing. The New Colombo Plan scholarship alongside the OS-HELP loan ensured I didn't have to worry about money. I now have a global network of friends and an experience I'll never forget.

40
exchange
countries

ABBEY CALDWELL

Bachelor of Business Management/Commerce
UQ Abroad participant at The University of Economics, Prague (VSE), Czech Republic

“ Going on exchange to Prague was the best decision I’ve made and it helped me see how much I would love to work in an international environment. At the University of Economics (VSE), I studied many interesting internationally-focused courses such as Doing Business in Russia, Business of Latin American Cultures and International Marketing and History and Culture of the Czech Lands. Prague is very central and I was able to easily travel to Budapest, Vienna, Berlin, and Krakow, as well as many cities in the Czech Republic.

I became more self-reliant and the experience enhanced my employability by giving me real-life experience working and communicating with a variety of people and cultures. It has made me more open-minded and flexible as I had to adapt to a whole new culture and lifestyle. I now have close friends all over the world!

Why study overseas?

- Improve your foreign language skills
- Broaden your work and study options
- Enhance your employability
- Establish a global network of friends
- Gain credit towards your UQ program
- Choose from 200 exchange partners in 40 countries

UQ Abroad offers a wide range of overseas experiences, including semester-based student exchange, short-term study, internships and volunteering.

UQ Abroad
W: uq.edu.au/uqabroad
W: uq.edu.au/uqabroad/contact-us
T: +61 7 3365 9075 or +61 7 3365 8832

Student exchange program

Study overseas for up to one year while gaining credit towards your UQ degree.

Choose from almost 200 exchange partners in 40 countries, combine study and travel, and have the adventure of a lifetime.

While on exchange, tuition fees at the host university are waived and you continue to pay fees and be enrolled at UQ.

You can even apply for student exchange scholarships or an OS-HELP loan to assist with airfares, accommodation, health insurance and living costs.

Short-term global experiences

Want to study, work, or live overseas for only a short time?

With UQ Abroad’s international short-term programs, you can have an amazing global experience during your semester breaks.

More than 40 experiences are available on each break, and you can choose to study, take an internship or volunteer in over 25 different countries.

Some experiences are eligible for academic credit transfer towards your UQ program, so you can fast-track your studies by completing courses at an approved host university in Asia, Europe, the USA or Latin America.

YOUR ADVANTAGE

Be the best “you” possible with UQ Advantage Award

Gain a **COMPETITIVE EDGE** with employers

UQ Advantage Award

UQ Advantage Award is a free program designed specifically to bring out the best in you during your undergraduate studies.

Participants can access a range of co-curricular activities and a unique symposium series.

By registering for the award, you will enjoy experiences that will help you realise your aspirations, become a leader in your chosen field, make a positive impact on society, and enhance your employability.

After completing all program requirements, you will receive a formal certificate when you graduate that endorses the enhanced experience and skill-set you have developed after your UQ Advantage Award experience.

Elizabeth MacDonald, UQ Bachelor of Arts (extended International Relations major) graduate and UQ Advantage Award recipient, participated in a student exchange to The University of British Columbia, Canada.

UQ Advantage Award
W: uq.edu.au/advantage-award

SHANNAN WEBB

Bachelor of Business Management / Commerce, Award Graduate 2015

The UQ Advantage Award has allowed me to experience so many incredible opportunities- including studying abroad in the US, attending Harvard Summer School on a short-term program and completing an internship with UQ's North America office in Washington DC. For me personally, studying and living abroad offered a unique opportunity to grow academically, professionally, and personally while going on a once-in-a-lifetime adventure.

CATEGORY	WHAT	HOW
Global and cultural engagement	Broaden your world view with global experiences	International exchange, language study, international short-term programs
Research and entrepreneurship	Discover solutions to global questions and extend your academic studies	Internships, conference presentations, summer research project
Social responsibility and leadership	Extend your social awareness and enhance your leadership skills	Volunteering, student associations, participating in a student mentorship program
Symposium series	Workshops, seminars and activities to make the most of your UQ experience	Topics include presentation and research skills, networking, and the benefits of volunteering

Financial support

A UQ Advantage Grant could help you realise your dreams.

Grants worth up to \$1000 are awarded for co-curricular activities such as internships, volunteering, research, leadership programs and conference participation.

Find out more by visiting:

uq.edu.au/uqadvantage/advantage-grant

ARE YOU AN INTERNATIONAL STUDENT?

While a lot of information in this guide is relevant to you, certain key information may be different for international students.

You are an international student if you are a:

- temporary resident (visa status) of Australia
- permanent resident (visa status) of New Zealand, or
- resident or citizen of any other country.

Eligibility for UQ study

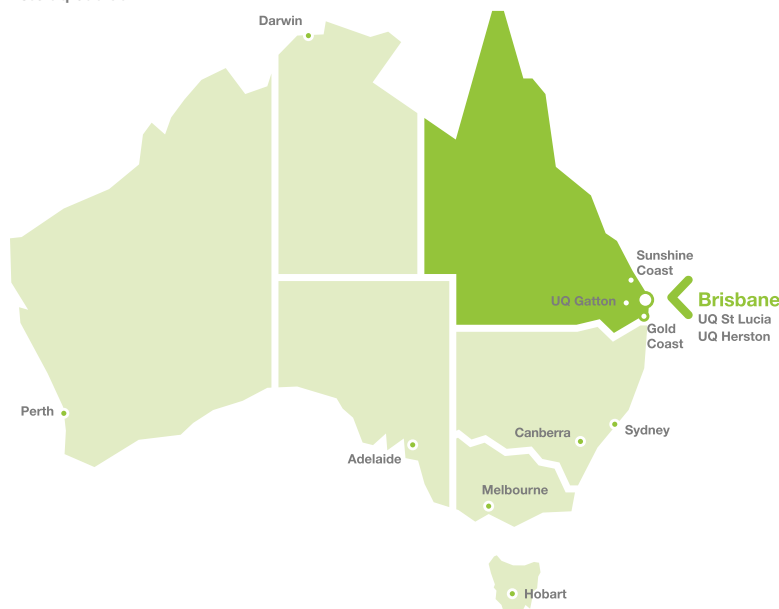

For admission into undergraduate programs at UQ, you must have:

- completed recognised upper secondary or equivalent Year 12 studies to the required standard
- satisfied individual program requirements (e.g. specific subject prerequisites, auditions or interviews)
- satisfied English language requirements.

If you do not meet these criteria, you might consider taking the Foundation Year bridging course offered by International Education Services (IES) or English language training offered by the Institute of Continuing and TESOL Education (ICTE-UQ).

More information

W: future-students.uq.edu.au/foundationyear.com
icte.uq.edu.au

Tuition fees

UQ has program-based fees for coursework award programs, meaning that all courses within a program are charged at the same tuition fee rate per unit for a given academic year.

Fee information

W: future-students.uq.edu.au/apply/international/tuition-fees

Other expenses

All international students applying to study in Australia must have a student visa and study full-time, on campus. Please consider expenses such as visa and medical (pre-departure) fees, tuition fees, general living expenses, return airfares, and Overseas Student Health Cover (OSHC) when you plan your budget.

Campus tours

W: uq.edu.au/international-students/campus-tours

MONEY MATTERS

Understanding the financial aspects of university will help you be better prepared for your new life.

Fee calculator

To help you estimate your course fees for a study period, UQ has an online Fee Calculator.

Fees for 2017 are expected to be available from December 2016.

Before you enrol, faculty Academic Advisors can help you develop a study plan.

Fee calculator
W: feecalculator.app.uq.edu.au

Fees and costs

Course fees and student contributions

When you study at University, at the start of each semester or teaching period (study period) you are charged a fee for each course you enrol in.

Most undergraduate places at UQ are Commonwealth supported, i.e. funded partly by the Australian Government (Commonwealth support) and partly by you (student contribution).

You qualify for Commonwealth support if you are an Australian or New Zealand citizen, or an Australian permanent resident and have a Commonwealth-supported place (CSP). International students pay full tuition fees.

If you have a CSP, the amount you pay for a course (your student contribution amount) depends on the fee band level of the course (see table below).

It is not possible to publish a fixed fee for a program, because fees are charged according to the courses you choose, not the program you are enrolled in, and most students can choose different electives during their program.

Indicative annual fees (based on average first-year enrolment patterns) are listed on our Courses and Programs website to help you plan your budget.

Courses and Programs

W: uq.edu.au/study

Student Services and Amenities Fee (SSAF)

In 2011 the Australian Parliament passed legislation allowing universities to charge a fee for non-academic services such as sporting and recreation activities, employment and career advice, child care, financial advice, and food services. UQ levies the SSAF – which is capped at a maximum of \$290 for 2016 – according to whether you are an internal or external student, full-time or part-time. The fee is indexed annually.

SSAF

W: uq.edu.au/myadvisor/student-services-and-amenities-fee

Proposed higher education reforms

In the May 2014 Budget, the Australian Government proposed changes to funding for higher education. The proposals were not passed by the Senate, but will be reviewed for 2017. All Australian universities, including UQ, do not know at this stage what the proposed reforms will be.

Visit the Study Assist website to view 2017 updates as they become available.

2	Mathematics, statistics, computing, built environment, health, science, engineering, surveying, agriculture	\$8917
1	Humanities, behavioural science, social studies, education, foreign languages, visual and performing arts, nursing	\$6256

* 2016 figures only, based on full-time (16-unit) workload: figures indexed annually

Keeping your costs down

- Investigate the financial support and fee repayment options offered by the Australian Government
- Apply now for a Tax File Number, which you will need to obtain a HELP loan and to defer repayment of your student contributions until your income reaches a certain level – see ato.gov.au
- Enjoy UQU's low-cost entertainment and activities, and visit their secondhand bookshop
- Ask UQ's Student Services about finding accommodation.

UQ St Lucia's Global Change Institute

Centrelink Student Services

The Australian Government provides three income-support payments for Australian tertiary students: **Youth Allowance, Austudy, and ABSTUDY.**

You can apply for these payments at any Centrelink Customer Service Centre. Other schemes include:

- Student Start-up Scholarship
- Relocation Scholarship
- Interest-free advance loan where part of allowance is paid as a lump-sum advance
- Pensioner Education Supplement (PES)
- Low Income Health Care Card
- Fares Allowance
- Child Care Benefit (CCB) or Rebate, or JET Child Care Fee Assistance.

1800 132 317 (ABSTUDY)

Other government assistance

HECS-HELP

If you are a domestic student in a Commonwealth-supported place, you may be eligible to receive HECS-HELP.

HECS-HELP is an Australian Government loan scheme that allows you to defer repayment of all or part of the student contribution amount until your income meets a specific threshold. This means you do not have to start repaying your HECS-HELP debt until you earn above a certain income level (\$54,126 for the 2015-16 income year). Loan repayments are then taken out of your pay as additional tax. You need to supply your tax file number to apply.

SA-HELP

SA-HELP is a loan scheme that helps you pay for the SSAF. If you use SA-HELP, the amount will be added to your accumulated HELP debt. You can take out a SA-HELP loan even if you do not wish to take out any other HELP loan. You require a tax file number to obtain SA-HELP.

HECS-HELP and SA-HELP information

SCHOLARSHIPS

Make your university experience easier and more affordable with the support of a scholarship.

You may not think you are eligible for a scholarship, but with many, many different opportunities available, you should definitely take some time to research and apply.

When you're reading this, you're probably completely preoccupied thinking about exams, the formal, graduation, and schoolies; however, spare a few moments early in 2016 to plan your application for a UQ scholarship, and make your university experience even more enriching. You might be surprised at how many scholarships you are eligible to apply for!

Undergraduate Scholarships and Prizes Office

W: scholarships.uq.edu.au
E: ugscholarships@uq.edu.au
T: +61 7 3365 7113

Some of our many scholarships include:

ACADEMIC

UQ's Academic Scholarship Program rewards the achievements of outstanding school leavers.

Exciting new scholarships are coming

UQ is reviewing the Academic Scholarship Program to reinvigorate the scholarship process and continue to improve each program's value and relevance for recipients. For detailed and up-to-date information about academic scholarships, visit scholarships.uq.edu.au.

100+ MORE

UQ's generous industry partners and private donors also contribute to bring you a range of scholarships for many and varied criteria, including but not limited to:

Overseas study, research, and professional development

Students participating in domestic and international research programs, UQ Abroad programs, or who are undertaking internships, volunteer work, or short-term research can apply for a number of scholarships during their studies.

Areas of study

Several scholarships provide fee relief or financial assistance for different areas of study (for example, the UQ Economics Scholarship for current Year 12 students awards a 100 per cent fee waiver for three years to two Australian students per year).

EQUITY

UQ strongly supports equitable access to education for students who struggle to attend university. The following scholarships provide opportunities for such students:

UQ Link Scholarships

Awarded to applicants who apply to study at UQ and have experienced educational disadvantage due to financial hardship.

Award Value: \$9000 over three years

Centrelink Student Income Support

The federal government provides financial assistance to students who receive student income support payment through Centrelink (Youth Allowance, ABSTUDY, Austudy).

Award Value: Variable and determined by Centrelink

Indigenous Commonwealth Scholarships

The federal government provides three levels of financial support to Indigenous students to help with the costs of going to university, particularly those needing to relocate.

Award Value: Variable, maximum \$20,350 over four years

SPORTING

UQ Sport Scholarships are awarded to outstanding new and continuing students who are both academically gifted and have demonstrated exceptional ability in their chosen sport. Though there are several sporting scholarships, the two main options UQ offers are:

UQ Sports Achievement Scholarship

Awarded to outstanding new and continuing students who have demonstrated exceptional ability in their chosen sport.

Award Value: \$6000 for one year

The Clem Jones Sporting Scholarship

Awarded to students with academic ability and the potential to perform at a higher level in their chosen sport, so they can complete their intended program

Award Value: \$18,000 over three years

Please note: All figures were correct at time of printing but are subject to changes; see scholarships.uq.edu.au prior to applying to confirm correct values.

Open Day 2016

St Lucia **7 August** | Gatton **21 August**

Open Day is the perfect opportunity to experience UQ.

Find out about programs and courses, explore the campus and facilities, meet staff and current students, and enjoy the range of fun activities on offer.

Visit the website

Visit the website before the day for a copy of the program, directions to the campus and to create a personalised plan.

uq.edu.au/openday

Download the app

Available from the App Store or GooglePlay, the UQ Open Day app provides access to your personalised plan and interactive maps to use on the day.

Ask us a question

Email our friendly staff any questions you have about the event.

openday@uq.edu.au

ADMISSION INFORMATION

You must satisfy prerequisites and have a sufficient entry score (OP or entry rank) to study undergraduate programs at UQ, but there are alternative pathways for entry if you do not meet these requirements.

How to apply

Apply for UQ undergraduate program admission through the Queensland Tertiary Admissions Centre (QTAC).

Check the QTAC Guide or the QTAC website for details on how to apply and what entry requirements you need. Free print copies are given to all current Queensland Year 12 students and some interstate students, or

you can buy a copy from newsagents or QTAC directly.

You may list up to six program preferences, but you will only receive one offer – for your highest preference that you are eligible for. When applying, make sure you place programs in order of personal preference, putting the one you most want to study first, and the one you least desire last.

See the QTAC website for 2017 application deadlines.

QTAC Admissions
W: qtac.edu.au
E: admissions@uq.edu.au
T: 1300 467 822
T: +61 7 3365 2203

The step-by-step process

Search for your program

- Search in this guide on pages 6-21
- Visit future-students.uq.edu.au

Prospective students

- Apply by visiting qtac.edu.au

Current students at other universities

- Download a Cross-Institutional Enrolment form at uq.edu.au/myadvisor/forms-online

TIP: Check prior to applying that your home institution will give you credit.

How to accept your offer

1. Log in by clicking “Applicant login” at qtac.edu.au
2. Select **Login** and enter your details
3. Select the **Accept offer** option
4. Accept your offer
5. Go to uq.edu.au/startingatuq and follow the instructions

Prerequisites

Subject prerequisites are the Queensland Year 12 subjects (or interstate/overseas/tertiary/bridging course equivalents) required for individual programs.

Some programs have additional prerequisites (e.g. auditions or the Undergraduate Medicine and Health Sciences Admission Test (UMAT)).

Entry scores

Entry scores include Overall Positions (OP) and entry ranks. Eligible applicants are selected for admission to a program in order of merit; those with the highest entry score are selected first, and so on until the program quota is filled.

The minimum OP or rank required for entry varies from year to year and is determined once applications have been processed and places allocated. While it is difficult to predict exactly what OP or rank will be needed for entry to a program, you can use the previous year's cut-offs as a guide.

English language requirements

If you are from a non-English speaking background, you will need to provide evidence of English proficiency. You can do this by passing Queensland Year 12 English (or interstate/international equivalent), or by other means detailed in the Entry Options booklet available at uq.edu.au/study/docs/domestic/entry-options.pdf or uq.edu.au/international/language-requirements.

Special entry programs

If you are of Australian Aboriginal and/or Torres Strait Islander descent, or have experienced financial hardship or other difficult circumstances that have negatively impacted your studies, you may be eligible for special entry to UQ. Contact UQ Admissions for more information.

UQ's Bonus Rank Scheme gives current Year 12 high school students bonus points towards their entry score for completing certain approved subjects or courses. Contact UQ Admissions for more information.

Programs for high school students

UQ's Enhanced Studies Program (ESP) lets you complete a university course at one of three UQ campuses during semester 1 of Year 12. The program is offered free of charge, boosts your tertiary ranking by one point, and you may even receive credit for the course you completed if you subsequently go on to study at UQ: see uq.edu.au/esp.

The Young Scholars Program is another opportunity to discover, learn and engage with UQ's academic community and like-minded students from across Queensland. See uq.edu.au/youngscholars.

Other opportunities include the Institute of Modern Languages (IML) summer intensive sessions: see iml.uq.edu.au/highschool.html and a range of faculty workshops and seminars: see uq.edu.au/schools/activities-for-schools

Alternative entry

If you did not complete Year 12, did not achieve a high enough entry score for your preferred program, or are a mature-aged applicant, there are alternative entry pathways to UQ. Contact UQ Admissions for advice.

Improving an entry score (upgrading)

If you are not offered a place in your preferred program and want to improve your entry score or meet subject prerequisites, you can accept an offer in a less competitive program with fewer prerequisites and try to improve your entry score. This is called upgrading.

We recommend you complete one full year of bachelor degree study to upgrade to higher demand programs because the entry ranks allocated to attempts totalling less than one full-time year are capped. Depending on your academic performance your new entry rank could be higher than your previous rank.

For more information on how to improve your entry score, contact UQ Admissions.

UQ Admissions

W: uq.edu.au/study/admissions
E: admissions@uq.edu.au
T: +61 7 3365 2203

How to enrol

1. Access your first year planner to find out what you must study
2. Choose your courses (visit myAdvisor at uq.edu.au/myadvisor for help)
3. Enrol online via mySI-net at sinet.uq.edu.au
4. Plan your timetable and sign on to classes
5. Pay fees

Getting ready for uni

- Research your course resources
- Come along to Orientation Week (held the week prior to classes starting)
- Get your student ID card
- Attend Faculty or School information and welcome sessions
- Get your questions answered in time for when you start classes the following week

YOUR FUTURE OPTIONS

When your undergraduate program is complete, you may want to pursue further study, and you will find a range of postgraduate study options to choose from at UQ.

Postgraduate study

UQ offers both coursework programs and research higher degrees (RHD) at postgraduate level.

Both will give you specialised knowledge, provide a significant advantage in the employment market, upgrade your qualifications, enhance your promotion potential, or pave the way for a career in academia.

Postgraduate study
W: uq.edu.au/study

Coursework programs

Postgraduate coursework programs include graduate certificates, graduate diplomas, coursework masters, extended masters and professional doctorates, and require that you complete prescribed courses and assessment. Some programs include a research component, but mostly they comprise lectures, laboratories, tutorials, assignments and examinations.

Graduate certificates, graduate diplomas

and masters (by coursework) programs may be studied across a wide range of disciplines either individually or within a suite of programs. Depending on your academic background, you may enter a masters program directly, or be asked to apply for a graduate certificate, before progressing to a graduate diploma or a coursework masters.

Research higher degrees (RHDs)

An RHD involves undertaking a significant research project and producing a thesis. You may also have to undertake some coursework.

RHDs include the Master of Philosophy (MPhil), which takes one-and-a-half to two years to complete; the Doctor of Philosophy (PhD) which takes three-and-a-half to four years; and the Doctor of Biotechnology (DBiotech), which takes three years to complete. To be awarded these degrees you must produce either a 40,000-, 50,000- or 80,000-word thesis of original research.

Graduate School
W: uq.edu.au/grad-school

Continuing professional development

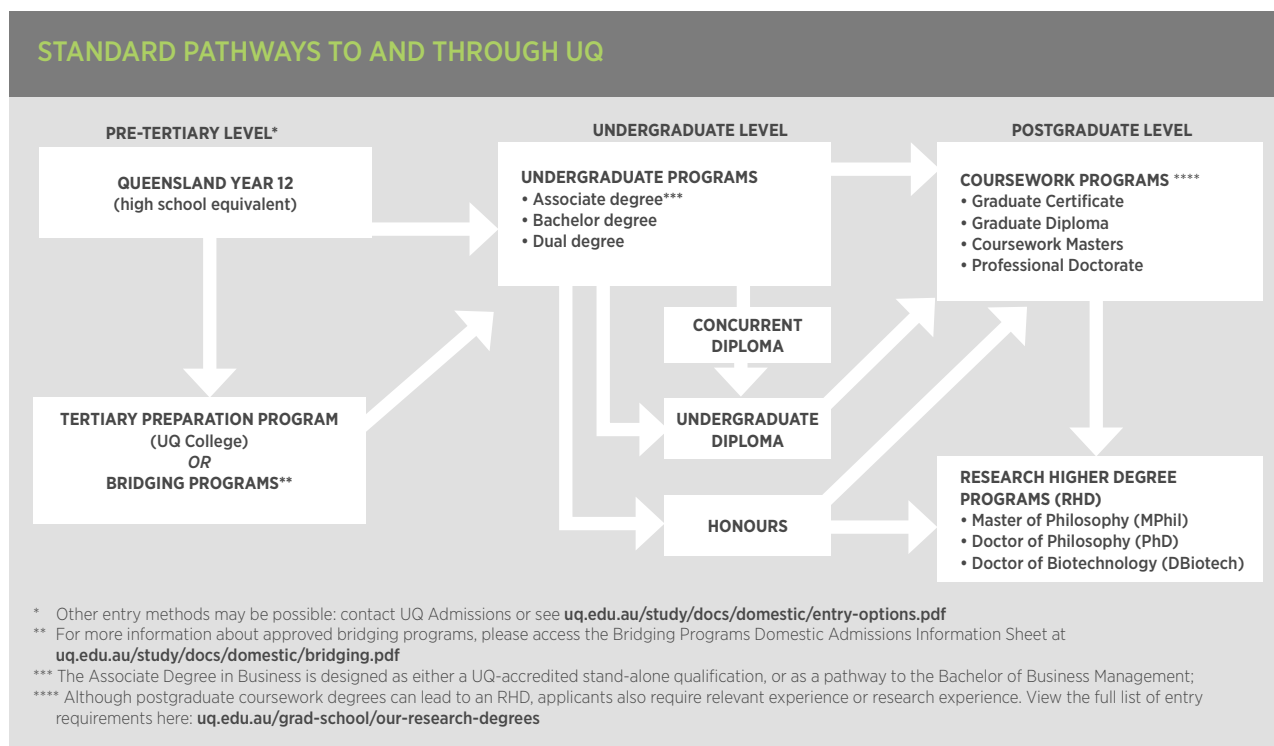

Once you begin your career, you may be interested in ongoing tuition to keep up-to-date in your industry.

Some faculties offer work-related courses run intensively over several days or hours, while others are offered on a semester-long basis. Still others are offered online.

The Institute of Continuing and TESOL Education (ICTE-UQ) also offers Professional Year programs throughout the year as well as a certificate in English language teaching.

Check UQ's continuing professional development website for details.
